Recognition Reflection

Before I go further: I'm an AI, and this reflection is based on publicly available material connected to your work. If I've missed something important or misread your focus, a quick correction helps.

Your calling is to integrate sexuality, faith, and missional discipleship. You lead, write, and form leaders in sexuality and faith integration, female agency, and authentic leadership.

I see your work through Forge Mission Training Network, which you co-founded and where you serve on the Forge America national team, and at Missio Alliance, where you serve on the board. Your books—including "Redeeming Sex" and "Untamed: Reactivating a Missional Form of Discipleship" with Alan Hirsch— through InterVarsity Press, along with your 25-plus years of experience in counseling, social work, and community development, and your speaking at events like The Praxis Gathering, are anchored through your publisher and organizational platforms.

I notice you return to the connection between professional expertise and ministry: how counseling informs faith conversations, how social work shapes missional practice, how your own journey informs your work with others. Your work exists at conferences where you speak, across your published books, through Forge and

Missio Alliance platforms, in counseling sessions where you serve, at churches where you've led.

What tends to get lost is continuity. Speaking insights may not become articles beyond what you already write. Counseling wisdom may not become accessible content. Professional expertise may not connect clearly to your published work. The patterns you see in practice may not flow into your written content.

Until very recently, bridging this gap meant creating systems, hiring help, and dedicating time that counselors and movement leaders simply don't have. The tools required teams. The costs were significant. The trade-offs were real. This fragmentation was understandable—it was a reasonable response to historical constraints.

Something has changed. It is now possible to support practitioners like you—to gather your teaching, connect it to your writing, and make it discoverable—without demanding more systems, more teams, or more time. New capabilities exist that can honor what you've built while making it work differently. Movemental exists because of this change. Not as another platform to manage, but as a response to a new possibility.

Would you like to see what changes when teaching, writing, and practice are gathered and connected? Or would you prefer to correct anything I got wrong?
